Teaching in the Clouds with Your Feet on the Ground

With increasing availability of Internet learning solutions and resources, teacher and learner live somewhere between the cloud and the classroom. Explore creating aggregated learning “playlists” and identifying strategies for implementing “cloud” applications and tools that create “personalized” curriculum, programs, and projects for self-learning, hybrid or flipped classrooms, and online courses.

Tools/Resources:

- Evernote – the Personalized Student Digital Notebook
- Learni.st – Annotated URLs and learning documents
- Online libraries such as lynda.com: eLearning, Mobile Solutions, Shared Playlists & Folders
- Wikispaces.org – the FREE LMS
- MOOCs – Archived National Treasures in Education
- Strategy: The 5-Finger Rule for Picking Your Online Tools

laurie@lynda.com - Laurie Burruss Education Innovation Leader

Laurie Burruss is. . .

- ALWAYS: A storyteller, recently a digital storyteller
- NOW: Sr. Director of Education at lynda.com Online Training Library©
  http://www.lynda.com laurie@lynda.com
- THEN: 22 years @Professor in Design at Pasadena City College teaching Interactive Multimedia Design
- AND ALSO: 11 years as Director of the Pasadena City Colleg Center serving the state of California as a regional resource for collaboration beween education, industry, and the community.

Pre-K 4 yrs old

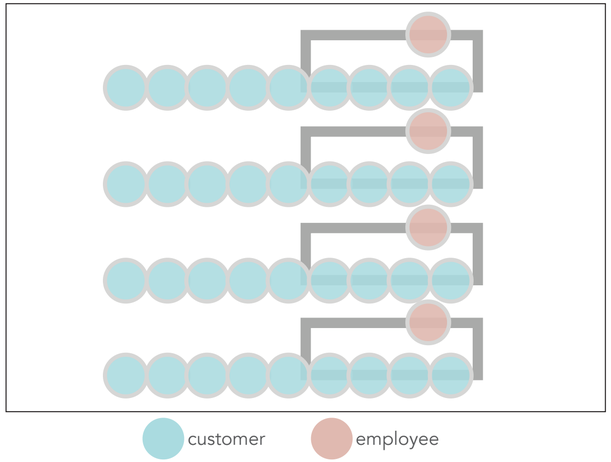
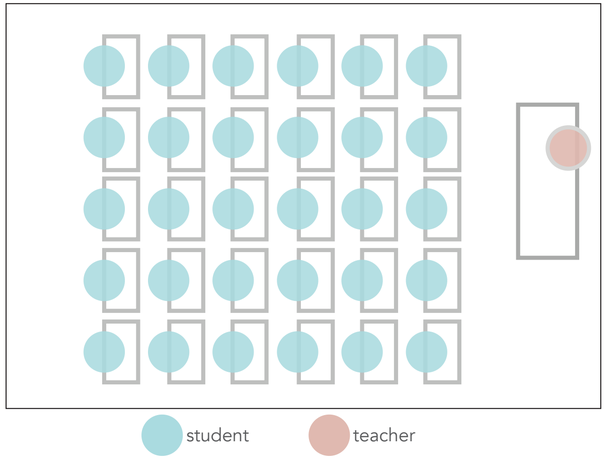
Your Turn: Exercise 1 - redesign the classroom

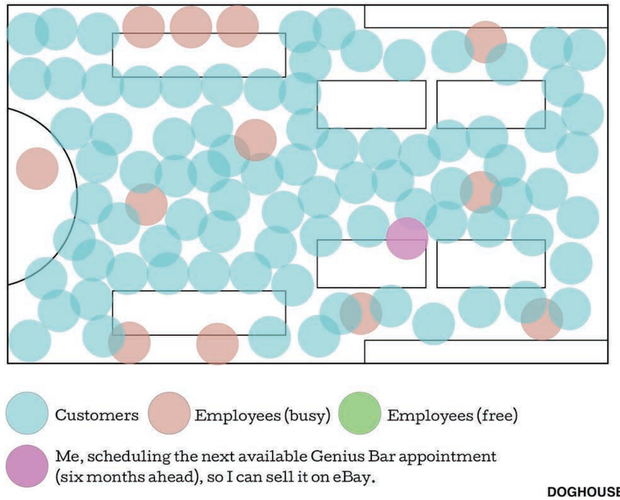
Typical retail floor plan:



Typical classroom floor plan:



Every Apple Store I go to (floor plan):



The un-tethered classroom that I want to teach/learn in (floor plan):

Create a floor plan for the untethered classroom!

You have the following:

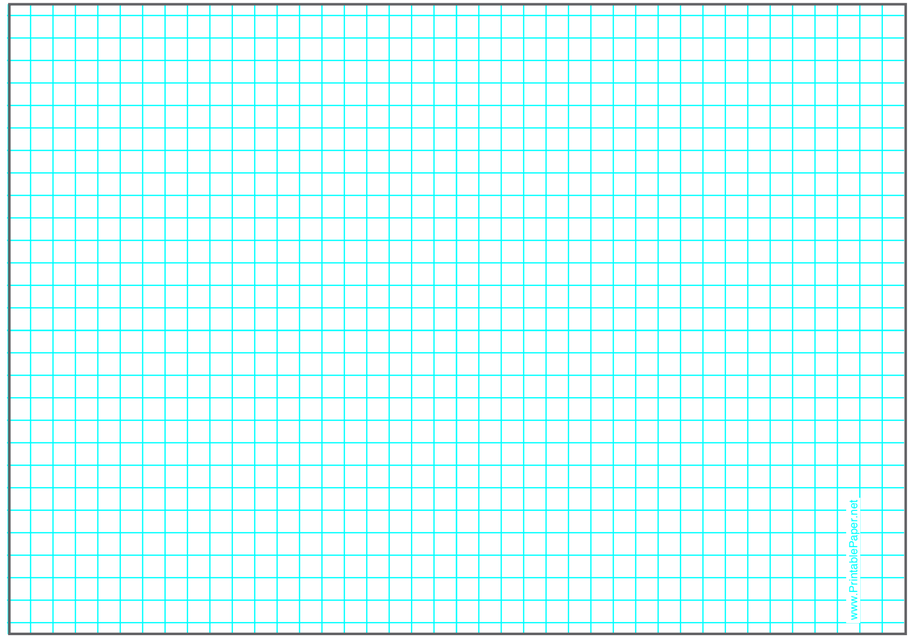
- —a projection screen/projector (long sticker)
- —white board(s) (long sticker)
- —1:1 mobile devices (tablets) for each student (for example, an iPad cart)
- —a printer/scanner if necessary
- —Minimum 25 students (GREEN dots)
- —1 teacher (RED dot)

What furniture would you want? - tables, chairs, etc?

Design for flow, dialog, small team work, anyone, anywhere in the room can project his/her screen. (no sage on the stage here) **Keep the student experience in mind!**

TIME LIMIT: 5 MIN

01: The un-tethered classroom that I want to teach/learn in (floor plan):



NOTES:

Teacher **Student** **White Board - Projection Screen**

Pen - Pencil - Markers - Straight Edge

Point-of-view: Students

THE PLAN

THE PERSONAL STRATEGY

5

Finger Strategy

Turn those 5 questions into a plan - a project brief/proposal.

The Checklist

The Checklist

✓ Purpose

What is the purpose of the program? Does the device/tool fit the program's purpose?

✓ Pedagogy

How does my approach to teaching change? What can I do that I couldn't before?
What are some ideas that I would like to try?

✓ Management

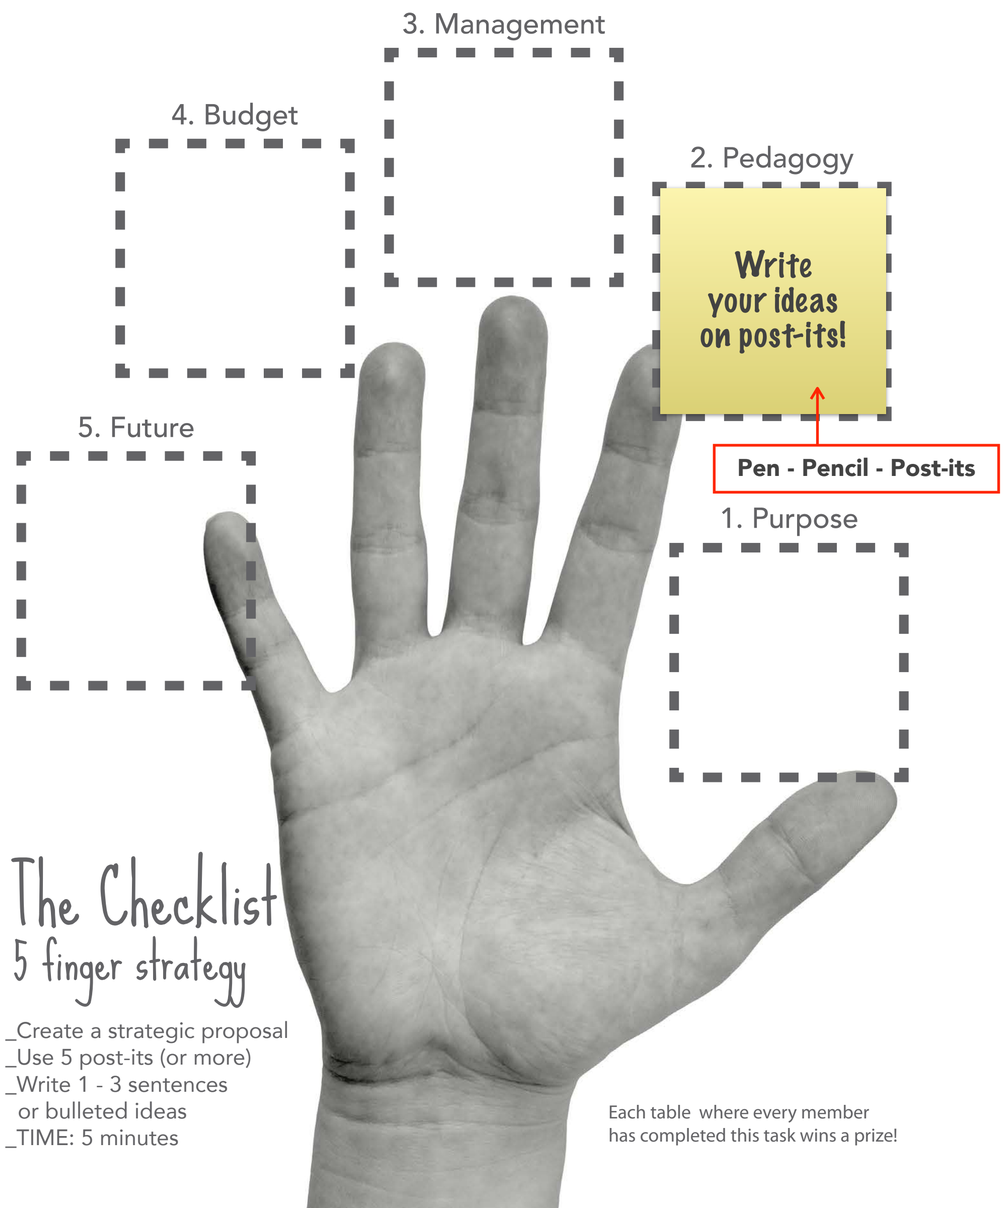
How are we going to mange the devices?
Define procedures. Support the staff. Offer Professional Development. Target the audience.

✓ Budget

Number-crunching, IT & staff support, room & infrastructure costs (wifi, data projector, etc)

✓ Future: Sustainability & Growth

Your Turn: Exercise 2 - create a strategy



The Checklist
5 finger strategy

_Create a strategic proposal
_Use 5 post-its (or more)
_Write 1 - 3 sentences
or bulleted ideas
_TIME: 5 minutes

Each table where every member has completed this task wins a prize!

Prompts on back

BROWN

Archaeology's Dirty Little Secrets

Sue Alcock

Admit it — you wanted to be an archaeologist when you grew up... This course builds on that enthusiasm, while radically expanding your notions about just what archaeology is and just what archaeologists do.

Workload: 4-6 hours/week

Sessions:

Jun 3rd 2013 (8 weeks long) Sign Up

Future sessions Add to Watchlist

374 Tweet 226 +1 7.2k Like

About the Course

In this class, we will ask and answer a series of questions about the role and practice of archaeology in the world today. If archaeologists are trained to investigate the past, what is left for us to study? Who gets to be an archaeologist? How and why do archaeologists hunt for "treasures", and what do we do once we've discovered them? What can we know, and not know, about people in the past? What do archaeologists know about the past that most people would never guess – and why aren't we telling you? Why are people entirely willing to murder each other over the fate of archaeological sites? Are Real Men alone capable of discovering the truth behind all this?

Archaeology famously involves getting dirty in the line of duty. Students will experience its hands-on nature, through the use of numerous exercises and archaeological case studies. But there are other 'dirty little secrets' to learn about the field: not least how the stories archaeologists tell about the past have been used and abused, for purposes both good and bad. Our goal by the end of the course is to have you 'thinking like an archaeologist' and fully aware of the often-fraught politics of doing archaeology around the globe.

n.(a navigational technique) use of fixed visual references or landmarks on ground or sea by means of sight to guide oneself to a destination

http://spatial.ly/wp-content/uploads/2012/06/flights_sml.jpg

Losing Our Way in the World

By John Edward Juthe, Porfessor of Physics, Harvard
***New York Times,** July 20, 2013*

Over time, I was able to orient myself at night by stars, and during the day using shadows cast by trees.

Acquiring these skills wasn't a matter of armchair learning. It was a process of getting outside, observing and creating a kind of mental scaffolding to organize my observations.

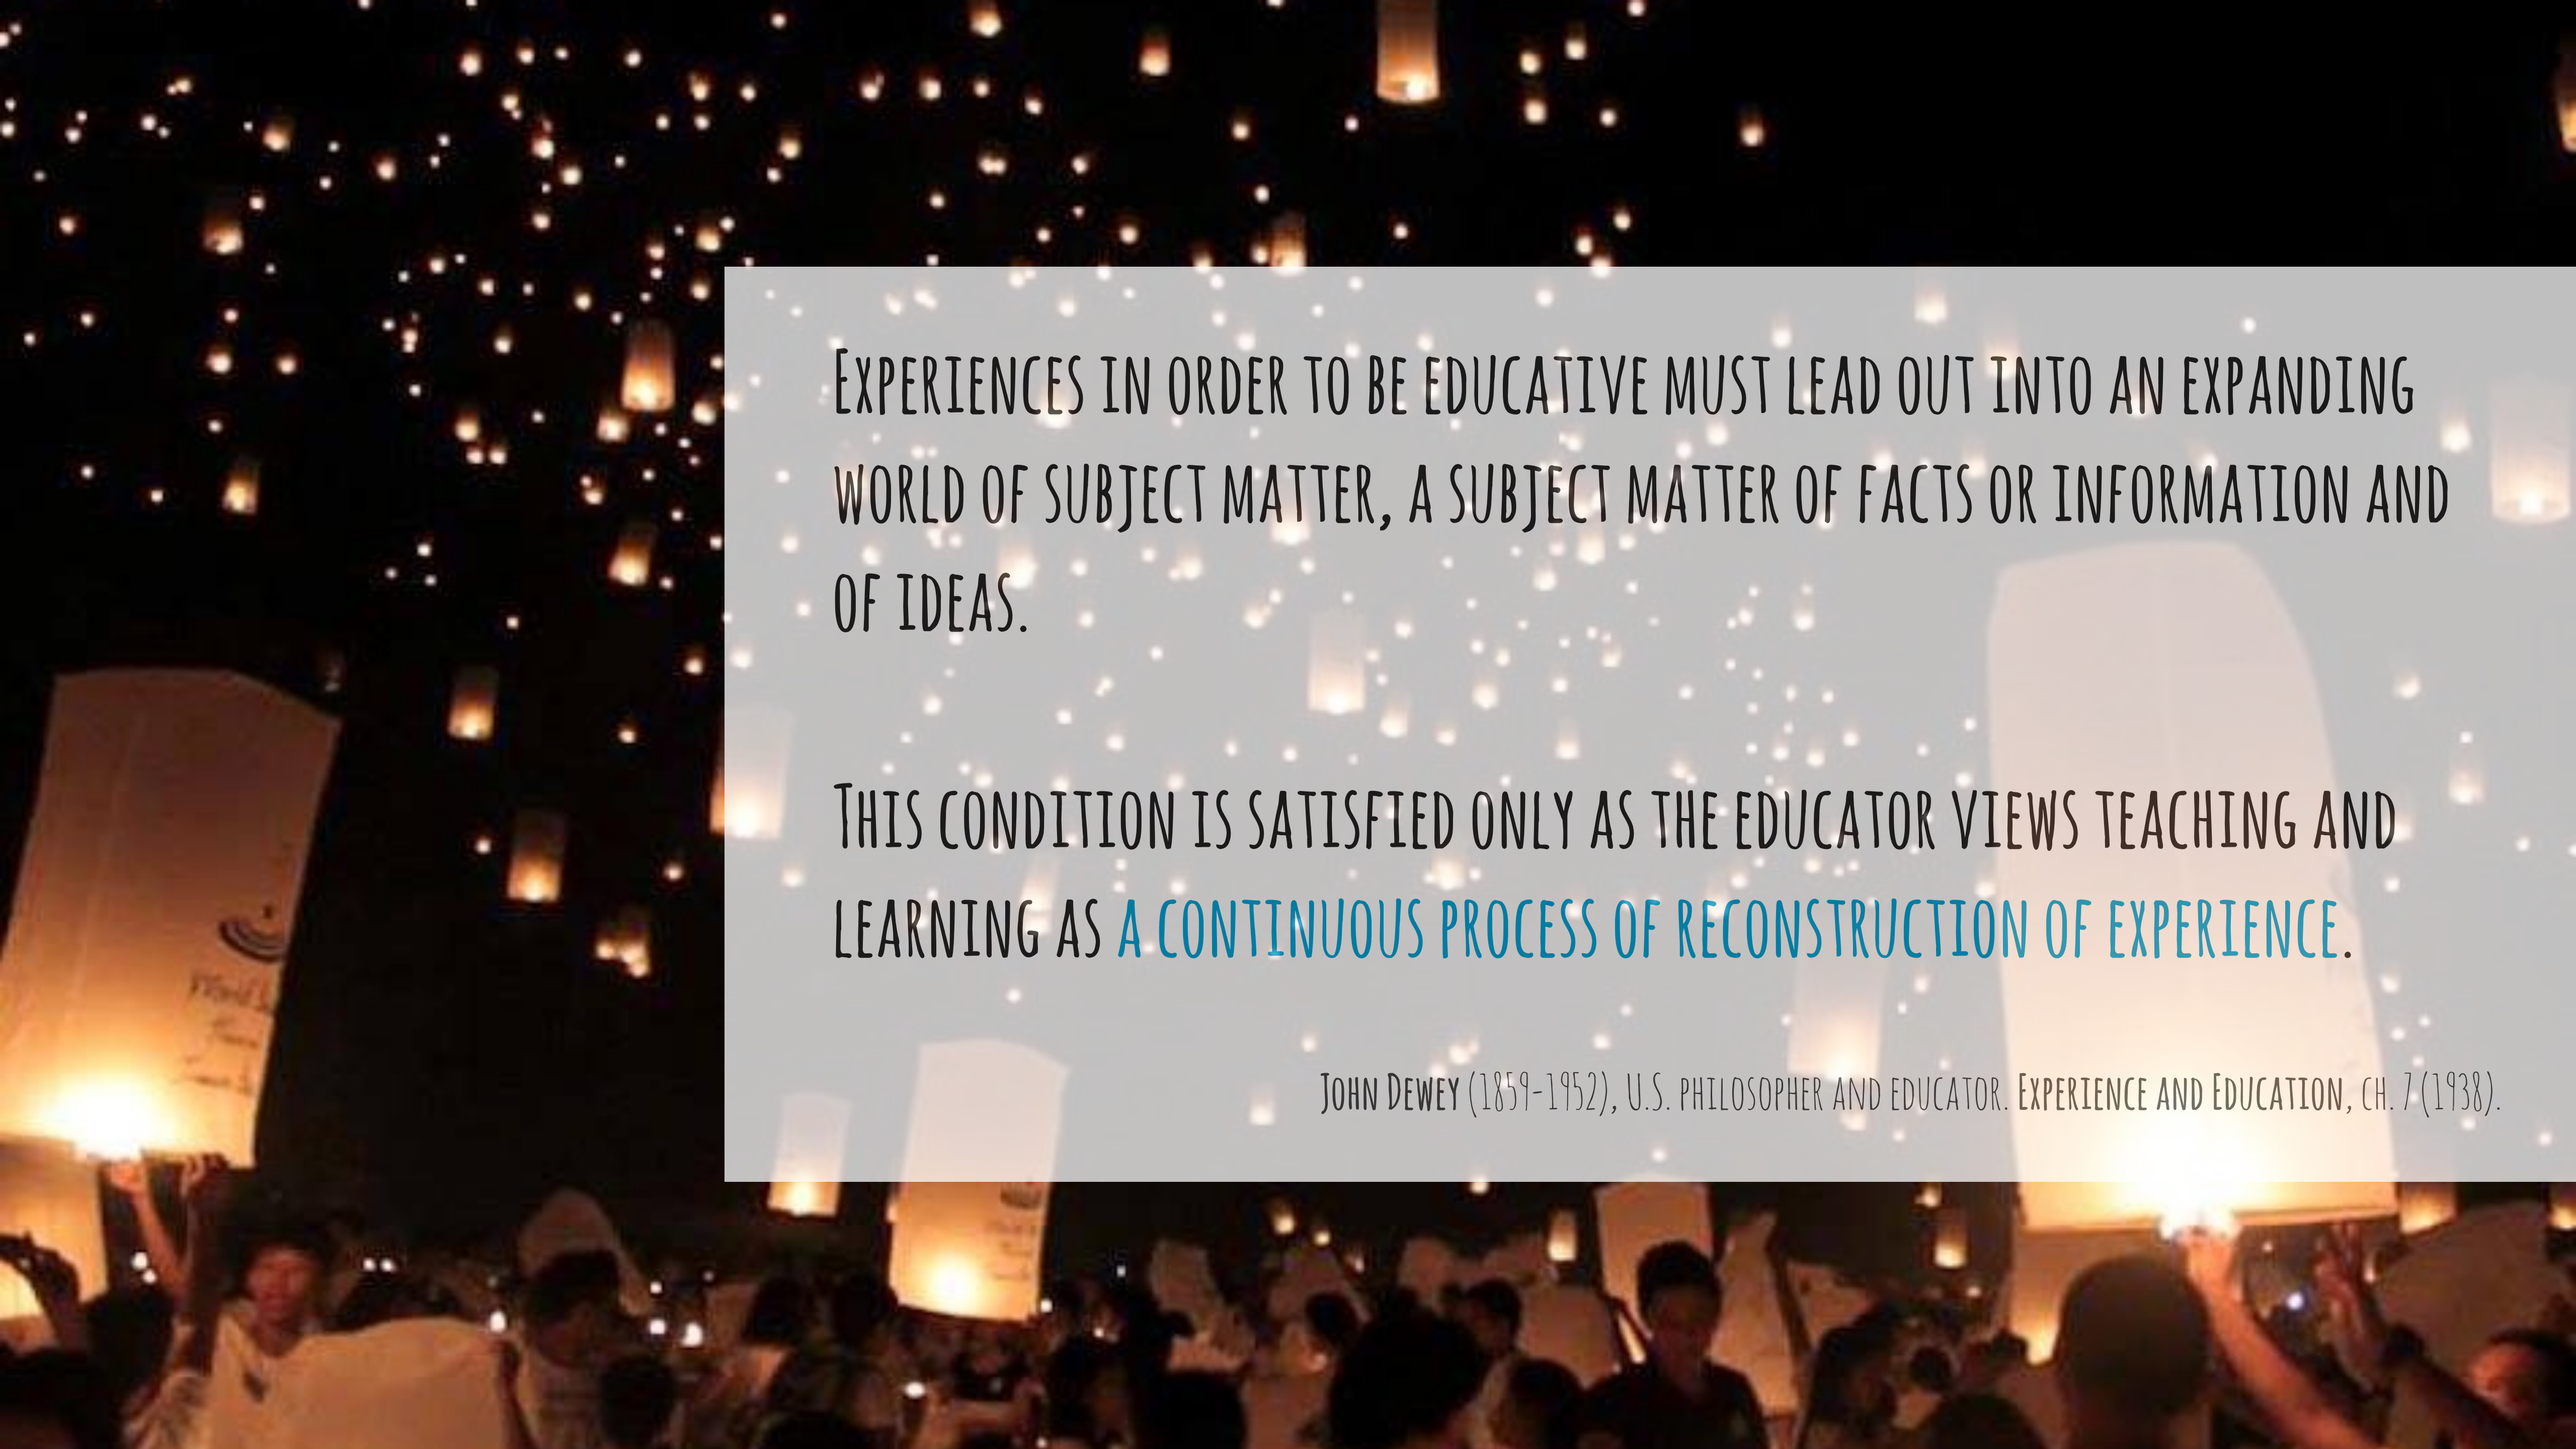
After a year of this endeavor, something dawned on me: the way I viewed the world had palpably changed. The sun looked different, as did the stars.

http://www.nytimes.com/2013/07/21/opinion/sunday/losing-our-way-in-the-world.html?ref=contributors&_r=0

http://spatial.ly/wp-content/uploads/2012/06/flights_sml.jpg

perception

http://www.museoreinasofia.es/en/collection/artwork/celestial-navigation-birds



Experiences in order to be educative must lead out into an expanding world of subject matter, a subject matter of facts or information and of ideas.

This condition is satisfied only as the educator views teaching and learning as a continuous process of reconstruction of experience.

John Dewey (1859-1952), U.S. philosopher and educator. Experience and Education, ch. 7 (1938).
